

GLOBAL
HARRISONS

Dough World
to taste lovers

CATALDOLGUE

About Us

We have been producing bakery products in Amsterdam for more than 50 years. To many European countries; We are a company that markets the products we produce to more than 600 locations.

We are happy to establish our 2nd factory, GLOBAL HARRISONS, in Gaziantep with a wider range of products, with Europe's consumption culture and service experience. Together with our project partners, we act with an approach that does not compromise on the HALAL production and food safety management system, prioritizes the consumer sensitivities of the working staff, and an environmentally friendly mission.

Mission

To bring the delicious flavors of Anatolia to taste lovers around the world.

Vision

With a corporate approach, we present the flavors produced by professional staff to the world market with different concepts and presentations and become a leader in the sector with our strategic partners.

Located at the intersection of Mesopotamia, one of the first settlement centers of Anatolia, and the Mediterranean region, the city is on the Silk Road and has hosted many civilizations. It has a mystical history where different cultures came together and synthesized. With the influence of civilizations, Gaziantep dishes have reached a privileged position among world cuisines. The variety of ingredients brought by its historical richness and geographical location has enabled Gaziantep cuisine to include many original food varieties. With the decision taken by the 2015 Unesco board of directors, it was included in the World cuisine list of creative cities established with the participation of 116 cities.

Many products have reached special values due to the historical flow of the Euphrates and the influence of the Sun it has captured. It is open to discoveries that will be talked about much more in the future, with its 10 thousand-year-old ancestral wheat, pistachios that have integrated their name with the city, and the products produced from them. We are honored to bring this great flavor heritage created by many civilizations to you, our partners.
